Performance figures quoted represent past performance and are no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than original cost. To obtain performance current to the most recent month-end, please visit bridgewayfunds.com or call 800-661-3550. Total return figures include the reinvestment of dividends and capital gains. Periods of less than one year are not annualized.

- ¹ Some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. The Adviser is contractually obligated to waive fees and/or pay expenses. Any material change to this Fund policy would require a vote by shareholders.
- ² Expense ratios are as stated in the current prospectus. Please see financial highlights for expense ratios as of December 31, 2022.
- * Numbers highlighted indicate periods when the Fund outperformed its primary benchmark.

This report is submitted for the general information of the shareholders of each Fund. It is not authorized for distribution to prospective investors unless preceded or accompanied by an effective prospectus, which includes information regarding a Fund's risks, objectives, fees and expenses, experience of its management, and other information. Investors should read the prospectus carefully before investing in a Fund. For questions or other Fund information, call 800-661-3550 or visit the Funds' website at bridgewayfunds.com. Funds are available for purchase by residents of the United States, Puerto Rico, US Virgin Islands, and Guam only.

The views expressed here are exclusively those of Fund management. These views, including those relating to the market, sectors, or individual stocks, are not meant as investment advice and should not be considered predictive in nature.

LETTER FROM THE INVESTMENT MANAGEMENT TEAM

December 31, 2022 (Unaudited)

Dear Fellow Shareholders.

Performance across domestic equity markets was positive for the December quarter. However, those gains were not enough to offset poor performance from earlier in 2022. Stocks in all size and style categories had negative returns for the year, but value stocks outperformed growth stocks across all size categories. Large-cap value stocks delivered the year's best performance, while large-cap growth stocks had the worst performance. Market highlights appear on page 2. In this environment, the Bridgeway Funds performed within design expectations, guided by our statistically driven, evidence-based investment approach. Please see the enclosed letters for a detailed explanation of each Fund's performance during the guarter and the calendar year. We hope you find the letters helpful.

As always, we appreciate your feedback. We take your comments very seriously and regularly discuss them to help us manage our Funds and this company. Please keep your ideas coming - both favorable and critical. They provide us with a vital tool to serve you better.

Sincerely,

Your Investment Management Team

on longomery

Market Review

Domestic equity markets rose during the quarter ended December 31, 2022 as investors reacted to signs of moderating inflation in October and November by driving stock prices higher. The positive trend reversed in December amid concerns about a potential recession, but the decline did not erase the quarter's earlier gains. However, positive fourth-quarter performance was not enough to offset declines from earlier in the calendar year, which were largely driven by high inflation and the US Federal Reserve's series of aggressive interest rate hikes. The S&P 500 returned +7.6% for the quarter, and the Dow Jones Industrial Average (DJIA) returned +16.0%. For the calendar year, the S&P 500 and the DJIA returned -18.1% and -6.9%, respectively.

All US equity style categories, as defined by Russell Indices, recorded positive returns for the quarter. Larger stocks outperformed smaller stocks in the value style category, but smaller stocks outperformed larger stocks in the growth style category. As a result, large-cap value stocks had the best performance during the quarter, returning +12.4%. Large-cap growth stocks had the worst performance on a relative basis, returning +2.2%.

All sectors of the S&P 500 except for the Consumer Discretionary and Communication Services sectors had positive returns for the quarter. The Energy sector recorded the largest gains, returning +23.1%, followed by Industrials (+19.2%) and Materials (+15.2%). The Consumer Discretionary sector had the worst performance, returning -10.2%.

Below are the stock market style box returns for the quarter and the calendar year.

MANAGER'S COMMENTARY (Unaudited)

December 31, 2022

Dear Fellow Aggressive Investors 1 Fund Shareholder,

For the quarter ended December 31, 2022, our Fund returned +7.02%, underperforming our primary market benchmark, the S&P 500 Index (+7.56%), but outperforming the Russell 2000 Index (+6.23%). It was a good quarter on an absolute basis, and a mixed quarter on a relative basis.

For the calendar year, our Fund returned -22.38%, underperforming the S&P 500 Index (-18.11%), and the Russell 2000 Index (-20.44%).

The table below presents our December quarter, six months, one-year, five-year, 10-year, 15-year, and inception-to-date financial results. See the next page for a graph of performance since inception.

Standardized Returns as of December 31, 2022

					Annualized		
	Quarter	6 Months	1 Year	5 Years	10 Years	15 Years	Since Inception (8/5/94)
Aggressive Investors 1 Fund	7.02%	5.48%	-22.38%	0.11%	7.69%	2.58%	10.80%
S&P 500 Index	7.56%	2.31%	-18.11%	9.42%	12.56%	8.81%	9.82%
Russell 2000 Index	6.23%	3.91%	-20.44%	4.13%	9.01%	7.16%	8.63%

Performance figures quoted in the table above represent past performance and are no guarantee of future results. Total return figures in the table above include the reinvestment of dividends and capital gains. The table above does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions, based on the average of 500 widely held common stocks with dividends reinvested. The Russell 2000 Index is an unmanaged, market value-weighted index that measures the performance of the 2,000 companies between the 1,000th and 3,000th largest in the market with dividends reinvested. It is not possible to invest directly in an index. Periods longer than one year are annualized.

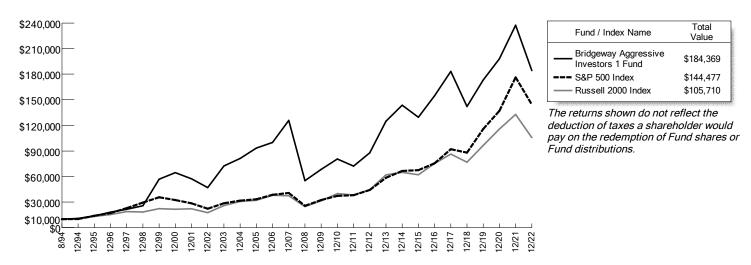

Aggressive Investors 1 Fund

MANAGER'S COMMENTARY (Unaudited) (continued)

Growth of a \$10,000 Investment

from Inception August 5, 1994 to December 31, 2022

Detailed Explanation of Quarterly Performance

The Fund's quality and sentiment models lagged the benchmark during the quarter, detracting from relative results. However, the Fund's value metrics models outperformed the benchmark and offset some of this negative impact. By design, the Fund invests in higher beta (exhibit greater sensitivity than the broader market) and higher volatility stocks, and this positioning detracted from relative returns during the quarter. In contrast, the Fund's tilt toward deeper value stocks helped relative results as value stocks outperformed growth stocks in the large-cap space. An overweighting in the benchmark's smaller stocks also helped the Fund's relative performance during the quarter.

From a sector perspective, the Fund's allocation effect was positive. Overweightings in the Energy and Materials sectors and an underweighting in the Communication Services sector contributed most to relative performance. The Fund's stock selection effect was negative, primarily driven by holdings in the Industrials, Consumer Staples, and Energy sectors.

Detailed Explanation of Calendar Year Performance

The Fund's quality models underperformed the benchmark and detracted from relative results. However, the Fund's sentiment and value metrics models outperformed the benchmark, partially offsetting this negative impact. Overweight exposure to higher beta and higher volatility stocks detracted from relative returns during the year. In contrast, the Fund's tilt toward smaller stocks and deeper value stocks across multiple valuation metrics helped relative performance during the year.

From a sector perspective, the Fund's allocation effect was positive, primarily driven by an overweighting in the Energy sector and an underweighting in the Communication Services sector. The Fund's stock selection effect was negative, with holdings in the Communication Services, Information Technology, and Health Care sectors detracting the most from relative performance.

Important Disclosure

The views expressed here are exclusively those of Fund management. These views, including those related to market sectors or individual stocks, are not meant as investment advice and should not be considered predictive in nature. Any favorable (or unfavorable) description of a holding applies only as of the quarter end, December 31, 2022, unless otherwise stated. Security positions can and do change thereafter. Discussions of historical performance do not guarantee and may not be indicative of future performance.

Market volatility can significantly affect short-term performance. The Fund is not an appropriate investment for short-term investors. Investments in the small companies within this multi-cap fund generally carry greater risk than is customarily associated with larger companies. This additional risk is attributable to a number of factors, including the relatively limited financial resources that are typically available to small companies and the fact that small companies often have comparatively limited product lines. In addition, the stock of small companies tends to be more volatile than the stock of large companies, particularly in the short term and particularly in the early stages of an economic or market downturn. The Fund's use of options, futures, and leverage can magnify the risk of loss in an unfavorable market, and the Fund's use of short-sale positions can, in theory, expose shareholders to unlimited loss. Finally, the Fund exposes shareholders to "focus risk," which

may add to Fund volatility through the possibility that a single company could significantly affect total return. Shareholders of the Fund, therefore, are taking on more risk than they would if they invested in the stock market as a whole.

Conclusion

Thank you for your continued investment in Aggressive Investors 1 Fund. We encourage your feedback; your reactions and concerns are important to us.

Sincerely,

The Investment Management Team

Aggressive Investors 1 Fund

MANAGER'S COMMENTARY (Unaudited)

December 31, 2022

Dear Fellow Ultra-Small Company Fund Shareholder,

For the quarter ended December 31, 2022, our Fund returned +10.14%, outperforming our primary market benchmark, the Russell Microcap Index (+4.72%), the CRSP Cap-Based Portfolio 10 Index (+0.53%), and the Russell 2000 Index (+6.23%). It was a good quarter.

For the calendar year, our Fund returned -10.72%, outperforming the Russell Microcap Index (-21.96%), the CRSP Cap-Based Portfolio 10 Index (-25.05%), and the Russell 2000 Index (-20.44%).

The table below presents our December quarter, six months, one-year, five-year, 10-year, 15-year, and inception-to-date financial results.

Standardized Returns as of December 31, 2022

		_			Annualized		
	Quarter	6 Months	1 Year	5 Years	10 Years	15 Years	Since Inception (8/5/94)

Russell Microcap Index	4.72%	4.22%	-21.96%	3.69%	8.86%	6.34%	N/A
CRSP Cap-Based Portfolio 10 Index	0.53%	-2.11%	-25.05%	4.95%	9.18%	7.78%	10.87%
Russell 2000 Index	6.23%	3.91%	-20.44%	4.13%	9.01%	7.16%	8.63%

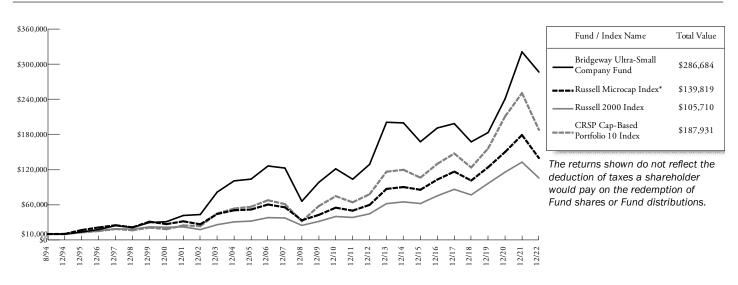

Performance figures quoted in the table above represent past performance and are no guarantee of future results. Total return figures in the table above include the reinvestment of dividends and capital gains. The table above does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Russell Microcap Index measures the performance of the microcap segment of the US equity market. Microcap stocks make up less than 3% of the US equity market (by market cap) and consist of the smallest 1,000 securities in the smallcap Russell 2000® Index, plus the next 1,000 smallest eligible securities by market cap. The Russell Microcap Index is constructed to provide a comprehensive and unbiased barometer for the microcap segment trading on national exchanges. The Index is completely reconstituted annually to ensure new and growing equities are reflected and companies continue to reflect appropriate capitalization and value characteristics. The Russell 2000 Index is an unmanaged, market value weighted index that measures performance of the 2,000 companies that are between the 1,000th and 3,000th largest in the market (with dividends reinvested). The CRSP Cap-Based Portfolio 10 Index is an unmanaged index of 769 of the smallest publicly traded US stocks (with dividends reinvested), as reported by the Center for Research on Security Prices. It is not possible to invest directly in an index. Periods longer than one year are annualized.

MANAGER'S COMMENTARY (Unaudited) (continued)

Growth of a \$10,000 Investment

from Inception August 5, 1994 to December 31, 2022

* The Russell Microcap Index began on 6/30/2000, and the line graph for the Index begins at the same value as the Fund on that date.

Detailed Explanation of Quarterly Performance

The Fund's quality and value model categories outperformed the benchmark during the quarter, boosting relative returns. However, the Fund's sentiment model category lagged the benchmark and offset some of this positive impact. The Fund's tilt toward deeper value stocks across multiple valuation metrics improved relative results during the quarter. In contrast, the Fund's tilt toward the smallest stocks in the US stock market (CRSP 9 and CRSP 10 universes) detracted from relative performance. During the quarter, the Fund held approximately 96% of its assets, on average, in CRSP 9 and CRSP 10, versus approximately 33% for the benchmark.

From a sector perspective, the Fund's allocation effect was positive, largely driven by overweightings in the Energy, Materials, and Health Care sectors. The Fund's stock selection effect was strongly positive. Holdings in the Health Care, Financials, and Information Technology sectors added the most to relative performance.

MANAGER'S COMMENTARY (Unaudited) (continued)

The table below presents index performance numbers for stocks in the different CRSP deciles during various time periods.

					Annualized	
CRSP Decile ¹	Quarter	6 Months	1 Year	5 Years	10 Years	97 Years
1 (ultra-large)	6.15%	1.48%	-20.26%	9.71%	12.76%	9.46%
2	8.62%	6.11%	-16.21%	8.66%	12.44%	10.52%
3	7.73%	4.81%	-19.57%	5.91%	10.78%	10.85%
4	6.88%	4.01%	-18.46%	4.76%	9.46%	10.63%
5	8.27%	3.82%	-17.66%	5.09%	8.93%	11.10%
6	6.04%	4.82%	-23.16%	4.38%	9.28%	11.08%
7	5.53%	4.74%	-20.88%	6.90%	11.25%	11.44%
8	1.36%	0.44%	-28.06%	0.15%	6.63%	10.92%
9	4.36%	2.73%	-23.54%	6.46%	10.65%	11.29%
10 (ultra-small)	0.53%	-2.11%	-25.05%	4.95%	9.18%	12.88%

1 Performance figures are as of the period ended December 31, 2022. The CRSP Cap-Based Portfolio Indexes are unmanaged indexes of publicly traded US stocks with dividends reinvested, grouped by market capitalization, as reported by the Center for Research in Security Prices. Past performance is no guarantee of future results.

Detailed Explanation of Calendar Year Performance

The Fund's quality and value model categories outperformed the benchmark during the year, adding to relative results. Underperformance by the Fund's sentiment model offset some of this positive impact. The Fund's tilt toward deeper value stocks across multiple valuation metrics improved relative performance. In contrast, the Fund's tilt toward the smallest stocks in the US stock market (CRSP 9 and CRSP 10 universes) detracted from relative results. During the year, the Fund held approximately 96% of its assets, on average, in CRSP 9 and 10, versus approximately 38% for the benchmark.

From a sector perspective, the Fund's allocation effect was positive. An overweighting in the Energy sector and an underweighting in the Health Care sector contributed the most to relative results. The Fund's stock selection effect was strongly positive, largely driven by holdings in the Industrials, Energy, Information Technology, and Health Care sectors.

Top Ten Holdings as of December 31, 2022

Rank	Description	Industry	% of Net Assets
1	Harrow Health, Inc.	Health Care	4.1%
2	Tactile Systems Technology, Inc.	Health Care	3.1%

Important Disclosure

The views expressed here are exclusively those of Fund management. These views, including those related to market sectors or individual stocks, are not meant as investment advice and should not be considered predictive in nature. Any favorable (or unfavorable) description of a holding applies only as of the quarter end, December 31, 2022, unless otherwise stated. Security positions can and do change thereafter. Discussions of historical performance do not guarantee and may not be indicative of future performance.

The Fund is subject to very high, above market risk (volatility) and is not an appropriate investment for short-term investors. Investments in ultra-small companies generally carry greater risk than is customarily associated with larger companies and even "small companies" for various reasons, such as narrower markets (fewer investors), limited financial resources and greater trading difficulty.

Conclusion

Ultra-Small Company Fund remains closed to new investors. We encourage your feedback; your reactions and concerns are important to us.

Sincerely,

The Investment Management Team

MANAGER'S COMMENTARY (Unaudited)

December 31, 2022

Dear Fellow Ultra-Small Company Market Fund Shareholder,

For the quarter ended December 31, 2022, our Fund returned +4.40%, underperforming our primary market benchmark, the Russell Microcap Index (+4.72%). The Fund also underperformed the Russell 2000 Index (+6.23%). The Fund outperformed the CRSP Cap-Based Portfolio 10 Index (+0.53%). It was a poor quarter on a relative basis, but a good one on an absolute basis.

For the calendar year, our Fund returned -23.40%, underperforming the Russell Microcap Index (-21.96%), and the Russell 2000 Index (-20.44%). The Fund outperformed the CRSP Cap-Based Portfolio 10 Index (-25.05%).

The table below presents our December quarter, six months, one-year, five-year, 10-year, 15-year, and inception-to-date financial results.

Standardized Returns as of December 31, 2022

		_			Annualized		
	Quarter	6 Months	1 Year	5 Years	10 Years	15 Years	Since Inception (7/31/97)
Ultra-Small Company Market Fund	4.40%	-3.32%	-23.40%	2.37%	8.32%	5.82%	9.17%
Russell Microcap Index	4.72%	4.22%	-21.96%	3.69%	8.86%	6.34%	N/A
CRSP Cap-Based Portfolio 10 Index	0.53%	-2.11%	-25.05%	4.95%	9.18%	7.78%	9.82%
Russell 2000 Index	6.23%	3.91%	-20.44%	4.13%	9.01%	7.16%	7.26%

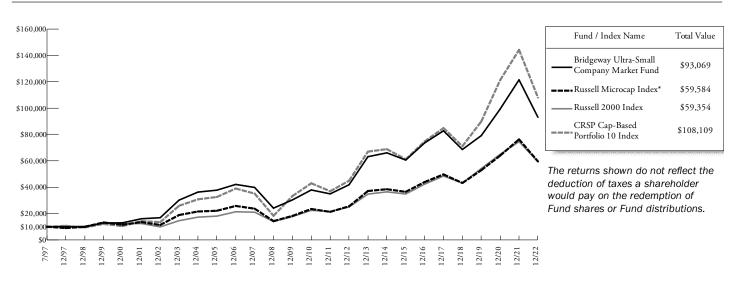

Performance figures quoted in the table above represent past performance and are no guarantee of future results. Total return figures in the table above include the reinvestment of dividends and capital gains. The table above does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Russell Microcap Index measures the performance of the microcap segment of the US equity market. Microcap stocks make up less than 3% of the US equity market (by market cap) and consist of the smallest 1,000 securities in the small-cap Russell 2000® Index, plus the next 1,000 smallest eligible securities by market cap. The Russell Microcap Index is constructed to provide a comprehensive and unbiased barometer for the microcap segment trading on national exchanges. The Index is completely reconstituted annually to ensure new and growing equities are reflected and companies continue to reflect appropriate capitalization and value characteristics. The Russell 2000 Index is an unmanaged, market value weighted index that measures performance of the 2,000 companies that are between the 1,000th and 3,000th largest in the market with dividends reinvested. The CRSP Cap-Based Portfolio 10 Index is an unmanaged index of 769 of the smallest publicly traded US stocks with dividends reinvested, as reported by the Center for Research on Security Prices. It is not possible to invest directly in an index. Periods longer than one year are annualized.

MANAGER'S COMMENTARY (Unaudited) (continued)

Growth of a \$10,000 Investment

from Inception July 31, 1997 to December 31, 2022

* The Russell Microcap Index began on 6/30/2000, and the line graph for the Index begins at the same value as the Fund on that date.

Detailed Explanation of Quarterly Performance

The Fund's investment universe focuses on the smallest stocks within the US stock market (CRSP 10 universe). This tilt toward the market's smallest stocks detracted from relative results, as CRSP 10 stocks underperformed the Russell Microcap Index. On average, the Fund held about 84% of its assets in the CRSP 10 universe, versus 16% for the benchmark during the quarter. In contrast, the Fund's sidestepping strategies, which eliminate exposure to stocks with high probability of a steep price decline, major financial distress or bankruptcy, helped performance relative to the CRSP 10 universe.

From a sector perspective, the Fund's stock selection effect was negative. Holdings in the Health Care and Industrials sectors detracted the most from relative performance.

The table below presents index performance numbers for stocks in the different CRSP deciles during various time periods.

					Annualized	
CRSP Decile ¹	Quarter	6 Months	1 Year	5 Years	10 Years	97 Years
1 (ultra-large)	6.15%	1.48%	-20.26%	9.71%	12.76%	9.46%
2	8.62%	6.11%	-16.21%	8.66%	12.44%	10.52%
3	7.73%	4.81%	-19.57%	5.91%	10.78%	10.85%
4	6.88%	4.01%	-18.46%	4.76%	9.46%	10.63%
5	8.27%	3.82%	-17.66%	5.09%	8.93%	11.10%
6	6.04%	4.82%	-23.16%	4.38%	9.28%	11.08%
7	5.53%	4.74%	-20.88%	6.90%	11.25%	11.44%
8	1.36%	0.44%	-28.06%	0.15%	6.63%	10.92%
9	4.36%	2.73%	-23.54%	6.46%	10.65%	11.29%
10 (ultra-small)	0.53%	-2.11%	-25.05%	4.95%	9.18%	12.88%

1 Performance figures are as of the period ended December 31, 2022. The CRSP Cap-Based Portfolio Indexes are unmanaged indexes of publicly traded US stocks with dividends reinvested, grouped by market capitalization, as reported by the Center for Research in Security Prices. Past performance is no guarantee of future results.

MANAGER'S COMMENTARY (Unaudited) (continued)

Detailed Explanation of Calendar Year Performance

The Fund's investment universe focuses on the smallest stocks within the US stock market (CRSP 10 universe). Our tilt toward the market's smallest stocks detracted from the Fund's relative performance, as CRSP 10 stocks underperformed the Russell Microcap Index. On average, the Fund held 83% of its assets in CRSP 10 universe during the year, versus 17% for the benchmark. However, the Fund's sidestepping strategies, which eliminate exposure to stocks with high probability of a steep price decline, major financial distress or bankruptcy, helped performance relative to the CRSP 10 universe.

From a sector perspective, the Fund's stock selection effect was negative. Holdings in the Health Care and Information Technology sectors detracted the most from relative performance.

Important Disclosure

The views expressed here are exclusively those of Fund management. These views, including those related to market sectors or individual stocks, are not meant as investment advice and should not be considered predictive in nature. Any favorable (or unfavorable) description of a holding applies only as of the quarter-end, December 31, 2022, unless otherwise stated.

MANAGER'S COMMENTARY (Unaudited) (continued)

Security positions can and do change thereafter. Discussions of historical performance do not guarantee and may not be indicative of future performance.

The Fund is subject to very high, above-market risk (volatility) and is not an appropriate investment for short-term investors. Investments in ultra-small companies generally carry greater risk than is customarily associated with larger companies and even "small companies" for various reasons, such as narrower markets (fewer investors), limited financial resources, and greater trading difficulty.

Conclusion

Thank you for your continued investment in Ultra-Small Company Market Fund. We encourage your feedback; your reactions and concerns are important to us.

Sincerely,

The Investment Management Team

December 31, 2022

Dear Fellow Small-Cap Value Fund Shareholder,

For the quarter ended December 31, 2022, our Fund returned +10.43%, outperforming our primary market benchmark, the Russell 2000 Value Index (+8.42%). It was a good quarter.

For the calendar year, our Fund returned -7.74%, leading the Russell 2000 Value Index (-14.48%).

The table below presents our December quarter, six months, one-year, five-year, 10-year, 15-year, and inception-to-date financial results.

Standardized Returns as of December 31, 2022

					Annualized		
	Quarter	6 Months	1 Year	5 Years	10 Years	15 Years	Since Inception (10/31/03)
Small-Cap Value Fund Russell 2000 Value Index	10.43% 8.42%	6.90% 3.42%	-7.74% -14.48%	11.63% 4.13%	11.62% 8.48%	7.49% 6.81%	8.88% 7.67%

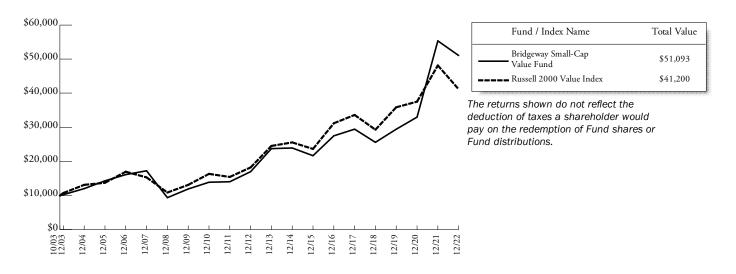

Performance figures quoted in the table above represent past performance and are no guarantee of future results. Total return figures in the table above include the reinvestment of dividends and capital gains. The table above does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Russell 2000 Value Index is an unmanaged index that consists of stocks in the Russell 2000 Index with lower priceto-book ratios and lower forecasted growth values with dividends reinvested. It is not possible to invest directly in an index. Periods longer than one year are annualized.

MANAGER'S COMMENTARY (Unaudited) (continued)

Growth of a \$10,000 Investment

from Inception October 31, 2003 to December 31, 2022

Detailed Explanation of Quarterly Performance

All three of the Fund's model categories outperformed the benchmark during the quarter, adding to relative results. The Fund's tilt toward deeper value stocks across multiple valuation metrics improved relative returns. However, its tilt toward smaller stocks in the small-cap value universe detracted from relative performance as smaller companies generally underperformed during the quarter.

From a sector perspective, the Fund's allocation effect was positive. An underweighting in the Health Care sector and overweightings in the Materials and Consumer Discretionary sectors added the most to relative results. The Fund's stock selection effect was also positive, with holdings in the Health Care, Financials, and Information Technology sectors adding the most to relative results.

Detailed Explanation of Calendar Year Performance

All three of the Fund's model categories outperformed the benchmark, improving relative results. The Fund's tilt toward deeper value stocks across multiple valuation metrics boosted relative returns during the year, although its tilt toward smaller stocks in the small-cap value universe detracted.

From a sector perspective, the Fund's allocation effect was positive. An overweighting in the Energy sector made the largest positive contribution to relative results. The Fund's stock selection effect was also strongly positive. Holdings in the Energy and Industrials sectors added the most to relative returns, with holdings in the Utilities and Materials sectors also making significant contributions.

Important Disclosure

The views expressed here are exclusively those of Fund management. These views, including those related to market sectors or individual stocks, are not meant as investment advice and should not be considered predictive in nature. Any favorable (or unfavorable) description of a holding applies only as of the quarter-end, December 31, 2022, unless otherwise stated. Security positions can and do change thereafter. Discussions of historical performance do not guarantee and may not be indicative of future performance.

Market volatility can significantly impact short-term performance. The Fund is not an appropriate investment for short-term investors. Investments in small companies generally carry greater risk than is customarily associated with larger companies. This additional risk is attributable to a number of factors, including the relatively limited financial resources that are typically available to small companies and the fact that small companies often have comparatively limited product lines. In addition, the stock of small companies tends to be more volatile than the stock of large companies, particularly in the short term and particularly in the early stages of an economic or market downturn. Shareholders of the Fund, therefore, are taking on more risk than they would if they invested in the stock market as a whole.

Conclusion

Thank you for your continued investment in Small-Cap Value Fund. We encourage your feedback; your reactions and concerns are important to us.

Sincerely,

The Investment Management Team

MANAGER'S COMMENTARY (Unaudited)

December 31, 2022

Dear Fellow Managed Volatility Fund Shareholder,

For the quarter ended December 31, 2022, our Fund returned +4.21%, underperforming our primary market benchmark, the S&P 500 Index (+7.56%). The Fund performed in line with its design during the quarter.

For the calendar year, our Fund returned -4.93%, outperforming the S&P 500 Index (-18.11%).

The table below presents our December quarter, six months, one-year, five-year, 10-year, 15-year, and inception-to-date financial results.

Standardized Returns as of December 31, 2022

					Annualized		
	Quarter	6 Months	1 Year	5 Years	10 Years	15 Years	Since Inception (6/30/01)
Managed Volatility Fund S&P 500 Index	4.21% 7.56%	5.15% 2.31%	-4.93% -18.11%	4.03% 9.42%	4.58% 12.56%	3.28% 8.81%	4.07% 7.54%

Performance figures quoted in the table above represent past performance and are no guarantee of future results. Total return figures in the table above include the reinvestment of dividends and capital gains. The table above does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

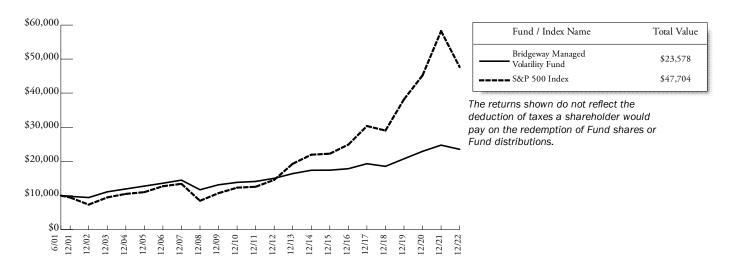

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions, based on the average of 500 widely held common stocks with dividends reinvested. It is not possible to invest directly in an index. Periods longer than one year are annualized.

MANAGER'S COMMENTARY (Unaudited) (continued)

Growth of a \$10,000 Investment

from Inception June 30, 2001 to December 31, 2022

Detailed Explanation of Quarterly Performance

For the quarter, the Fund captured 56% of the S&P 500 Index's return. The Fund had an annualized standard deviation of 8.86% during the quarter, which was 64% lower than the S&P 500's annualized standard deviation of 24.92% during the same period. Standard deviation is a statistical tool that measures the deviation or dispersion of the data from the mean or average. When related to funds and indexes, it tells you how much the return from the Fund portfolio or index holdings is straying from the expected return, based on historical performance.

The portfolio's futures component detracted from results, returning -1.2%. This performance was in line with expectations during a quarter characterized by a rising equity market. The portfolio's equities component added the most to the Fund's results, returning +3.1%. The portfolios options and fixed income components also helped the Fund's performance, returning +2.0% and +0.2%, respectively.

Detailed Explanation of Calendar Year Performance

For the calendar year, the Fund outperformed the S&P 500 Index. The Fund's annualized standard deviation of 10.16% was 59% lower than the S&P 500's annualized standard deviation of 24.51% during the same period.

The portfolio's equities component detracted from the Fund's performance, returning -11.4%. However, the portfolio's options and futures components added to results, returning +3.3% and +3.0%, respectively. The portfolio's fixed income component also added to the Fund's returns, returning +0.2.

The Fund continues to perform as designed, particularly over longer time horizons. For the past 10 years and since inception, the Fund has captured roughly 36% and 54%, respectively, of the S&P 500's return. The Fund's annualized standard deviation has been about 59% lower than the index's for the last 10 years, and about 56% lower since inception.

Important Disclosure

The views expressed here are exclusively those of Fund management. These views, including those related to market sectors or individual stocks, are not meant as investment advice and should not be considered predictive in nature. Any favorable (or unfavorable) description of a holding applies only as of the quarter end, December 31, 2022, unless otherwise stated. Security positions can and do change thereafter. Discussions of historical performance do not guarantee and may not be indicative of future performance.

Market volatility can significantly affect short-term performance. The Fund is not an appropriate investment for short-term investors. Investments in the small companies within this multi-cap fund generally carry greater risk than is customarily associated with larger companies. This additional risk is attributable to a number of factors, including the relatively limited financial resources that are typically available to small companies and the fact that small companies often have comparatively limited product lines. In addition, the stock of small companies tends to be more volatile than the stock of large

companies, particularly in the short term and particularly in the early stages of an economic or market downturn. The Fund's use of options, futures, and leverage can magnify the risk of loss in an unfavorable market, and the Fund's use of short-sale positions can, in theory, expose shareholders to unlimited loss. Shareholders of the Fund, therefore, are taking on more risk than they would if they invested in the stock market as a whole. The Fund uses an option writing strategy in which the Fund may sell covered calls or secured put options. Options are subject to special risks and may not fully protect the Fund against declines in the value of its stocks. In addition, an option writing strategy limits the upside profit potential normally associated with stocks. Finally, the Fund's fixed-income holdings are subject to three types of risk. Interest rate risk is the chance that bond prices overall will decline as interest rates rise. Credit risk is the chance that a bond issuer will fail to pay interest and principal. Prepayment risk is the chance that a mortgage-backed bond issuer will repay a higher yielding bond, resulting in a lower paying yield.

Conclusion

Thank you for your continued investment in Managed Volatility Fund. We encourage your feedback; your reactions and concerns are important to us.

Sincerely,

The Investment Management Team

NOTES TO FINANCIAL STATEMENTS

1. Organization

Bridgeway Funds, Inc. ("Bridgeway" or the "Company") was organized as a Maryland corporation on October 19, 1993, and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company.

Bridgeway is organized as a series fund, with seven investment funds as of December 31, 2022. The Aggressive Investors 1, Ultra-Small Company, Ultra-Small Company Market, Small-Cap Value, and Managed Volatility Funds are presented in this report (each is referred to as a "Fund" and collectively, the "Funds"). The Omni Small-Cap Value and Omni Tax-Managed Small-Cap Value Funds are included in a separate report.

Small-Cap Growth Fund was reorganized into Small-Cap Value Fund on September 24, 2021. (See Note 9).

Bridgeway is authorized to issue 1,915,000,000 shares of common stock at \$0.001 per share. As of December 31, 2022, 15,000,000 shares have been classified into the Ultra-Small Company Fund. 100,000,000 shares each have been classified into the Aggressive Investors 1, Ultra-Small Company Market, Omni Small-Cap Value, Omni Tax-Managed Small-Cap Value, and Small-Cap Value Funds. 50,000,000 shares have been classified into the Managed Volatility Fund.

The Ultra-Small Company Fund is open to existing investors (direct only).

The Funds are no-load, diversified funds.

The Aggressive Investors 1 Fund seeks to exceed the stock market total return (primarily through capital appreciation) at a level of total risk roughly equal to that of the stock market over longer periods of time (three-year intervals or more).

The Ultra-Small Company, Ultra-Small Company Market, and Small-Cap Value Funds seek to provide a long-term total return-on-capital, primarily through capital appreciation.

The Managed Volatility Fund seeks to provide a high current return with short-term risk less than or equal to 40% of the stock market.

Bridgeway Capital Management, LLC (the "Adviser") is the investment adviser for all of the Funds.

2. Significant Accounting Policies:

Following is a summary of significant accounting policies that are followed in the preparation of the financial statements of the Funds. They are in conformity with accounting principles generally accepted in the United States of America ("GAAP"). Each Fund is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

Securities, Options, Futures, and Other Investments Valuation Other than options, securities for which market quotations are readily available are valued at the last sale price on the national exchange on which such securities are primarily traded. In the case of securities reported on the National Association of Securities Dealers Automated Quotation ("Nasdaq") system, the securities are valued based on the Nasdaq Official Closing Price ("NOCP"). In the absence of recorded sales on their primary exchange, or NOCP, in the case of Nasdaq traded securities, the security will be valued as follows: bid prices for long positions and ask prices for short positions.

Fixed income securities are valued on the basis that incorporates market observable data such as reported sales of similar securities, broker quotes, bids, offers and current market quotations by a pricing service. Options are valued at the close if there is trading volume, and if there is no trading volume, the options are valued at the bid on long positions and the ask on the short positions.

Investments in open-end registered investment companies and closed-end registered investment companies that do not trade on an exchange are valued at the end of day net asset value ("NAV") per share.

Investments in closed-end registered investment companies that trade on an exchange are valued at the last sales price as of the close of the customary trading session on the exchange where the security is principally traded.

When market quotations are not readily available or when events occur that make established valuation methods unreliable, securities of the Funds may be valued at fair value as determined in good faith by or under the direction of the Board of Directors. Pursuant to Rule 2a-5 under the 1940 Act, the Board has designated the Adviser as the "valuation designee" to make all necessary determinations of fair value. The valuation assigned to a fair valued security for purposes of calculating the Funds' NAVs may differ from the security's most recent closing market price and from the prices used by other mutual funds to calculate their NAVs.

The inputs and valuation techniques used to determine the value of a Fund's investments are summarized into three levels as described in the hierarchy below:

• Level 1 - quoted prices in active markets for identical assets

Investments whose values are based on quoted market prices in active markets, and whose values are therefore classified as Level 1 prices, include active listed equity securities. The Adviser does not adjust the quoted price for such investments, even in situations where the Funds hold a large position and a sale could reasonably impact the quoted price.

 Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Investments that trade in markets that are not considered to be active, but whose values are based on quoted market prices, dealer quotations, or valuations provided by alternative pricing sources supported by observable inputs, are classified as Level 2 prices. These generally include certain US Government and sovereign obligations, most government agency securities, investment-grade corporate bonds, and less liquid listed equity securities. As investments whose values are classified as Level 2 prices include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

 Level 3 – significant unobservable inputs (including the Adviser's own assumptions in determining the fair value of investments)

Investments whose values are classified as Level 3 prices have significant unobservable inputs, as they may trade infrequently or not at all. When observable prices are not available for these securities, the Adviser uses one or more valuation techniques for which sufficient and reliable data is available. The inputs used by the Adviser in estimating the value of Level 3 prices may include the original transaction price, quoted prices for similar securities or assets in active markets, completed or pending third-party transactions in the underlying investment or comparable issuers, and changes in financial ratios or cash flows. Level 3 prices may also be adjusted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by the Adviser in the absence of market information. Assumptions used by the Adviser due to the lack of observable inputs may significantly impact the resulting value and therefore the results of the Funds' operations.

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. A summary of the inputs used to value the Funds' investments as of December 31, 2022 is included with each Fund's Schedule of Investments.

Details regarding material transfers into, and material transfers out of, Level 3, if any, can be found at the end of each Schedule of Investments for Funds that held Level 3 securities.

Securities Lending Upon lending its securities to third parties, each participating Fund receives compensation in the form of fees. The loans are secured by collateral at least equal to the fair value of the securities loaned plus accrued interest. The remaining contractual maturity of all securities lending transactions is overnight and continuous. Each Fund has the right under the lending agreement to recover the securities from the borrower on demand. Additionally, a Fund does not have the right to sell or re-pledge collateral received in the form of securities unless the borrower goes into default. The risks to a Fund

of securities lending are that the borrower may not provide additional collateral when required or return the securities when due, resulting in a loss. Under the terms of the Securities Lending Agreement, the Funds are indemnified for such losses by the securities lending agent.

While securities are on loan, the Fund continues to receive dividends on the securities loaned and recognizes any unrealized gain or loss in the fair value of the securities loaned.

Securities lending transactions are entered into by a Fund under a Securities Lending Agreement which provides the right, in the event of default (including bankruptcy or insolvency) for the non-defaulting party to liquidate the collateral or to offset the market value of the collateral received against the market value of the securities loaned. The value of the collateral is typically greater than that of the market value of the securities loaned, leaving the lender with a net amount payable to the defaulting party. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of a counterparty's bankruptcy or insolvency.

The market value of securities on loan, all of which are classified as common stocks in the Funds' Schedules of Investments, and the value of the related cash collateral are shown in the Statements of Assets and Liabilities as a component of Investments at value. Securities lending transactions are considered to be overnight and continuous and can be terminated by the Funds or the borrower at any time. During the period ended December 31, 2022 the Managed Volatility Fund did not have any securities lending transactions.

The following table is a summary of the Funds' payable upon return of securities loaned and related cash collateral, which are subject to a netting agreement as of December 31, 2022:

				in the Sta	unt Not Offset tements of d Liabilities	_
Fund	Gross Amounts of Recognized Liabilities ¹	Gross Amounts Offset in the Statements of Assets and Liabilities	Net Amounts of Assets Presented in the Statements of Assets and Liabilities		Collateral Received	Net Amount
Aggressive Investors 1	• • • • • • • •		• · · • • · ·		A	
Securities lending	\$1,774,661	\$-	\$1,774,661	\$-	\$1,774,661	\$-
Ultra-Small Company						
Securities lending	\$4,657,864	-	\$4,657,864	-	\$4,657,864	-
Ultra-Small Company Market						
Securities lending	\$15,178,678	_	\$15,178,678	-	\$15,178,678	-
Small-Cap Value						
Securities lending	\$10,403,275	-	\$10,403,275	-	\$10,403,275	-

¹ Securities loaned with a value of \$115,736 in Ultra-Small Company Market have been sold and are pending settlement on December 31, 2022.

The following table summarizes the securities received as non-cash collateral and cash collateral for securities lending:

	N	on-Cash	Collateral				
			Maturity				Market Value
		Coupon			Cash	Total	of Securities
Fund	Collateral Type	Range	Range	Market Value	Collateral	Collateral	on Loan
Aggressive Investors 1							
Securities lending	U.S.Gov't	0.13%-	02/15/23-				
	Obligations	4.75%	11/15/51	\$3,900,737	\$1,774,661	\$5,675,398	\$5,508,222
Ultra-Small Company							
Securities lending	U.S.Gov't	0.13%-	02/28/23-				
	Obligations	4.75%	11/15/51	\$2,880,406	\$4,657,864	\$7,538,270	\$7,311,481
Ultra-Small Company Market							
Securities lending	U.S.Gov't	0.13%-	02/15/23-				
	Obligations	4.67%	11/15/51	\$1,118,390	\$15,178,678	\$16,297,068	\$15,584,470
Small-Cap Value							
Securities lending	U.S.Gov't	0.13%-	02/15/23-				
	Obligations	4.75%	11/15/51	\$7,064,537	\$10,403,275	\$17,467,812	\$16,990,281

It is each Fund's policy to obtain additional collateral from, or return excess collateral to, the borrower by the end of the next business day following the valuation date of the securities loaned. Therefore, the value of the collateral held may be temporarily less than that required under the lending contract. As of December 31, 2022, the collateral consisted of an institutional government money market fund and US Government Obligations.

Use of Estimates in Financial Statements In preparing financial statements in conformity with GAAP, management makes estimates and assumptions that affect the reported amounts of assets and liabilities on the date of the financial statements and the disclosure of contingent assets and liabilities on the date of the financial statements, as well as the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Concentrations of Credit Risk The Funds maintain cash and securities in its custody account, maintained by a high-credit, quality financial institution. Cash balances may, at times, exceed the FDIC insurance limit. Cash balances are generally invested in a short-term investment vehicle, which minimizes the risk of cash balances exceeding the FDIC insurance limit.

Sector Concentration Risk Companies with similar characteristics may be grouped together in broad categories called sectors. Although each Fund seeks investments across a number of sectors, from time to time, based on economic conditions, each Fund may have significant positions in particular sectors. A certain sector may underperform other sectors or the market as a whole. As more assets are held in a specific sector, a Fund's performance will be more susceptible to any economic, business or other developments which generally affect that sector.

Risks and Uncertainties The Funds provide for various investment options, including stocks, bonds, and call and put options. Such investments are exposed to risks, such as interest rate, market, and credit risks. Due to the risks involved, it is at least reasonably possible that changes in risks in the near term would materially affect shareholders' account values and the amounts reported in the financial statements.

The global pandemic outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption, affecting the global economy and the financial health of individual companies in significant and unforeseen ways. COVID-19 has resulted in, among other things, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, significant disruptions to business operations, market closures, cancellations and restrictions, supply chain disruptions, lower consumer demand, and significant volatility and declines in global financial markets, as well as general concern and uncertainty. Instability in the United States, European and other credit markets has made it more difficult for borrowers to obtain financing or refinancing on attractive terms or at all. In particular, because of the current conditions in the credit markets, borrowers may be subject to increased interest expenses

for borrowed money and tightening underwriting standards. In addition, stock prices as well as yield could be negatively impacted to the extent that issuers of equity securities cancel or announce the suspension of dividends or share buybacks. The COVID-19 pandemic could continue to inhibit global, national, and local economic activity, and constrain access to capital and other sources of funding. Various recent government interventions have been aimed at curtailing the distress to financial markets caused by the COVID-19 outbreak. There can be no guarantee that these or other economic stimulus plans (within the United States or other affected countries throughout the world) will be sufficient or will have their intended effect. In addition, an unexpected or quick reversal of such policies could increase market volatility, which could adversely affect a Fund's investments. The duration and future impact of COVID-19 are currently unknown, which may exacerbate the other risks that apply to a Fund and could negatively affect Fund performance and the value of your investment in a Fund.

Security Transactions, Investment Income, and Expenses Security transactions are accounted for as of the trade date, the date the order to buy or sell is executed. Realized gains and losses are computed on the identified cost basis. Dividend income is recorded on the ex-dividend date, and interest income is recorded on the accrual basis from settlement date. Particularly as related to the Managed Volatility Fund, discounts and premiums are accreted/amortized using the effective interest method. Income from the securities lending program is recorded when earned from the securities lending agent and reflected in the Statement of Operations under "Securities lending."

Fund expenses that are not series-specific are allocated to each series based upon its relative proportion of net assets to the Funds' total net assets or other appropriate basis.

Distributions to Shareholders The Funds pay dividends from net investment income and distribute realized capital gains annually, usually in December.

Derivatives The Funds' use of derivatives for the period ended **December 31**, 2022 was limited to futures contracts, purchased options, and written options. The following is a summary of how these derivatives are treated in the financial statements and their impact on the Funds, categorized by primary underlying risk.

Primary Underlying Risk/Fund	Derivative Assets	Derivati Liabilitio	
Equity Risk Managed Volatility: Written Put Options	_	\$476.08	9 Put options written at value
Written Call Options	-	310,25	1
Primary Underlying Risk/Fund	Amount of Realized Gain (Loss) on Derivatives	Amount of Unrealized Gain (Loss) on Derivatives	Location of Gain (Loss) in the Statement of Operations
Equity Risk Managed Volatility: Written Options	\$537,765		Realized Gain (Loss) on Written Options Change in Unrealized Appreciation
			(Depreciation) on Written Options

The derivative instruments outstanding as of December 31, 2022, as disclosed in the Schedule of Investments, and the amounts of realized and changes in unrealized gains and losses on derivative instruments during the period ended December 31, 2022, as disclosed in the Statements of Operations, serve as indicators of the volume of derivatives activity for the Funds.

\$631,550

Futures Contracts The Funds may purchase or sell financial futures contracts to hedge cash positions, manage market risk, and to dampen volatility in line with investment objectives. A futures contract is an agreement between two parties to buy or sell a financial instrument at a set price on a future date. Upon entering into such a contract, a Fund is required to pledge

Realized Gain (Loss) on Futures Contracts

Futures Contracts

to the broker an amount of cash or US Government securities equal to the minimum "initial margin" requirements of the exchange on which the futures contract is traded. The contract amount reflects the extent of a Fund's exposure in these financial instruments. A Fund's participation in the futures markets involves certain risks, including imperfect correlation between movements in the price of futures contracts and movements in the price of the securities hedged or used for cover. Pursuant to a contract, such Fund agrees to receive from, or pay to, the broker an amount of cash equal to the fluctuation in value of the contract. Such receipts or payments are known as "variation margin" and are recorded by a Fund as unrealized appreciation or depreciation. When a contract is closed, a Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. With futures, there is minimal counterparty risk to the Funds, since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default. As of December 31, 2022, the Funds had no open futures contracts.

Options The Managed Volatility Fund may buy and sell calls and puts to reduce the Fund's volatility and provide some cash flow. An option is a contract conveying a right to buy or sell a financial instrument at a specified price during a stipulated period. The premium paid by a Fund for the purchase of a call or a put option is included in such Fund's Schedule of Investments as an investment and subsequently marked-to-market to reflect the current market value of the option. When a Fund writes a call or a put option, an amount equal to the premium received by such Fund is included in its Statement of Assets and Liabilities as a liability and is subsequently marked-to-market to reflect the current market value of the option written. If an option that a Fund has written either expires on its stipulated expiration date, or if such Fund enters into a closing purchase transaction, that Fund realizes a gain (or a loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such options is extinguished. If a call option that a Fund has written is assigned, such Fund realizes a gain or loss from the sale of the underlying security, and the proceeds from such sale are increased by the premium originally received. If a put option that a Fund has written is assigned, the amount of the premium originally received reduces the cost of the security that such Fund purchased upon exercise of the option. Buying calls increases a Fund's exposure to the underlying security to the extent of any premium paid. Buying puts on a stock market index tends to limit a Fund's exposure to a stock market decline. All options purchased by the Funds were listed on exchanges and considered liquid positions with readily available market quotes.

Covered Call Options and Secured Puts The Managed Volatility Fund may write call options on a covered basis; that is, the Fund will own the underlying security, or the Fund may write secured puts. The principal reason for writing covered calls and secured puts on a security is to attempt to realize income through the receipt of premiums. The option writer has, in return for the premium, given up the opportunity for profit from a substantial price increase in the underlying security so long as the obligation as a writer continues, but has retained the risk of loss should the price of the security decline. All options were listed on exchanges and considered liquid positions with readily available market quotes.

Outstanding written options as of December 31, 2022 for the Managed Volatility Fund are included in the Schedule of Investments.

Indemnification Under the Company's organizational documents, the Funds' officers, directors, employees and agents are indemnified against certain liabilities that may arise out of the performance of their duties to the Funds. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

3. Advisory Fees, Other Related Party Transactions and Contingencies:

The Funds have entered into management agreements with the Adviser. As compensation for the advisory services rendered, facilities furnished, and expenses borne by the Adviser, the Funds pay the Adviser a fee pursuant to each Fund's management agreement, as described below.

Aggressive Investors 1 Fund and Small-Cap Value Fund each have management fees that are comprised of a base fee, which is applied to the Fund's average annual net assets, and a performance adjustment, which adjusts the fee upward or

downward depending on a Fund's performance relative to the applicable market index over a rolling five-year performance period, and is applied to the Fund's average daily net assets over this performance period.

Because the performance adjustment is based on a Fund's performance relative to the applicable market index, and not the Fund's absolute performance, the performance adjustment could increase the Adviser's fee even if the Fund's shares lose value over the performance period, provided that the Fund outperformed its market index, or could decrease the Adviser's fee even if the Fund's shares increase in value during the performance period, provided that the Fund underperformed its market index. Also, depending on a Fund's performance relative to the applicable market index over the rolling five-year performance period, the performance adjustment could increase the Adviser's fee even if the Fund has experienced underperformance relative to its market index in the short-term, or could decrease the Adviser's fee even if the Fund has experienced outperformance relative to its market index in the short-term. However, no performance fee adjustment will be applied to the Adviser's fee if the cumulative difference between a Fund's performance and that of the applicable market index is less than or equal to 2% over the rolling five-year performance period.

Additionally, because the base fee is applied to average annual net assets, and the performance adjustment is calculated over a rolling five-year performance period, it is possible that if a Fund underperforms the applicable market index significantly over the performance period, and the Fund's assets have declined significantly over that performance period, the negative performance adjustment may exceed the base fee. In this event, the Adviser would make a payment to the Fund.

Aggressive Investors 1: A total advisory fee is paid by the Fund to the Adviser that is comprised of a Base Fee and a Performance Adjustment. The Base Fee equals the Base Fee Rate times the average daily net assets of the Fund. The Base Fee Rate is based on the following annual rates: 0.90% of the first \$250 million of the Fund's average daily net assets, 0.875% of the next \$250 million, 0.85% of the next \$500 million and 0.80% of any net assets in excess of \$1 billion.

The Performance Adjustment equals 4.67% times the difference in cumulative total return between the Fund and the Standard and Poor's 500 Composite Stock Price Index with dividends reinvested (hereinafter "Index") over a rolling five-year performance period. The Performance Adjustment Rate varies from a minimum of -0.70% to a maximum of +0.70%. However, the Performance Adjustment Rate is zero if the difference between the cumulative Fund performance and the Index performance is less than or equal to 2%.

Ultra-Small Company: The Fund pays advisory fees based on the following annual rates: 0.90% of the first \$250 million of the Fund's average daily net assets, 0.875% of the next \$250 million and 0.85% of any excess over \$500 million. The management fees are computed daily and are payable monthly. However, during any period when the Fund's net assets range from \$27,500,000 to \$55,000,000, the advisory fee will be determined as if the Fund had \$55,000,000 under management. This is limited to a maximum annualized expense ratio of 1.49% of average net assets.

Ultra-Small Company Market: The Fund's advisory fee is a flat 0.50% of the value of the Fund's average daily net assets, computed daily and payable monthly.

Small-Cap Value: A total advisory fee is paid by each Fund to the Adviser that is comprised of a Base Fee and a Performance Adjustment. The Base Fee equals the Base Fee Rate times the average daily net assets of the Fund. The Base Fee Rate is based on the annual rate of 0.60% of the value of each Fund's average daily net assets.

The Performance Adjustment equals 0.33% times the difference in cumulative total return between the Fund and the Russell 2000 Value Index, with dividends reinvested (hereinafter "Index") over a rolling five-year performance period. The Performance Adjustment Rate varies from a minimum of -0.05% to a maximum of +0.05%. However, the Performance Adjustment Rate is zero if the difference between the cumulative Fund Performance and the Index performance is less than or equal to 2%.

Managed Volatility: The Fund's advisory fee is a flat 0.60% of the value of the Fund's average daily net assets, computed daily and payable monthly.

Expense limitations: The Adviser has agreed to reimburse the Funds for operating expenses and management fees above the expense limitations shown in the table below, which are shown as a ratio of net expenses to average net assets, for each

Fund, for the period ended December 31, 2022. Any material change to the expense limitation would require a vote by shareholders of the applicable Fund.

Bridgeway Fund	Expense Limitation	Total Waivers and Reimbursements for Period Ended 12/31/22
Aggressive Investors 1	1.75%	\$-
Ultra-Small Company	1.85%	_
Ultra-Small Company Market	0.75%	80,918
Small-Cap Value	0.94%	-
Managed Volatility	0.94%	45,409

Other Related Party Transactions: The Funds will engage in inter-portfolio trades when it is to the benefit of both parties. The Board of Directors reviews a report on inter-portfolio trades quarterly. Inter-portfolio purchases and sales during the period ended December 31, 2022 were as follows:

Bridgeway Fund	Inter-Portfolio Purchases	Inter-Portfolio Sales
Ultra-Small Company	\$ 5,864,207	\$ 3,413,370
Ultra-Small Company Market	4,206,148	6,864,357
Small-Cap Value	10,215,031	2,728,346

The Adviser entered into an Administrative Services Agreement with Bridgeway, pursuant to which the Adviser provides various administrative services to the Funds, including, but not limited to: (i) supervising and managing various aspects of the Funds' business and affairs; (ii) selecting, overseeing and/or coordinating activities with other service providers to the Funds; (iii) providing reports to the Board of Directors as requested from time to time; (iv) assisting and/or reviewing amendments and updates to the Funds' registration statement and other filings with the Securities and Exchange Commission ("SEC"); (v) providing certain shareholder services; (vi) providing administrative support in connection with meetings of the Board of Directors; and (vii) providing certain record-keeping services. For its services to all of the Bridgeway Funds, the Adviser is paid an annual aggregate fee of \$150,000, payable in equal monthly installments. For the allocation of this expense to each of the Funds, please see the Statements of Operations.

Board of Directors Compensation Independent Directors are paid an annual retainer of \$20,000, with an additional retainer of \$5,000 paid to the Independent Chairman of the Board and an additional retainer of \$1,000 paid to the Nominating and Corporate Governance Committee Chair. The retainer is paid in quarterly installments. In addition, Independent Directors are paid \$14,000 per meeting for meeting fees. Such compensation is the total compensation from all Bridgeway Funds and is allocated among the Bridgeway Funds.

Independent Directors are reimbursed for any expenses incurred in attending meetings and conferences, as well as expenses for subscriptions or printed materials. The amount of directors' fees attributable to each Fund is disclosed in the Statements of Operations.

One director of Bridgeway, John Montgomery, is an owner and director of the Adviser. Under the 1940 Act definitions, he is considered to be an "affiliated person" of the Adviser and an "interested person" of the Adviser and of Bridgeway. Compensation for Mr. Montgomery is borne by the Adviser rather than the Funds.

4. Distribution Agreement:

Foreside Fund Services, LLC acts as distributor of the Funds' shares, pursuant to a Distribution Agreement dated September 30, 2021. The Adviser pays all costs and expenses associated with distribution of the Funds' shares, pursuant to a protective plan adopted by shareholders pursuant to Rule 12b-1.

5. Purchases and Sales of Investment Securities:

Purchases and sales of investments, other than short-term securities, for each Fund for the period ended December 31, 2022 were as follows:

	Purcha	Purchases		Sales		
Bridgeway Fund	U.S. Government	Other	U.S. Government	Other		
Aggressive Investors 1	\$-	\$64,764,372	\$-	\$68,295,166		
Ultra-Small Company	-	27,357,171	-	29,260,765		
Ultra-Small Company Market	-	62,600,429	_	56,167,116		
Small-Cap Value	-	197,913,660	-	123,305,207		
Managed Volatility	-	3,065,211	-	2,852,531		
с ,						

6. Federal Income Taxes

It is the Funds' policy to continue to comply with the provisions of the Internal Revenue Code of 1986, as amended ("Internal Revenue Code"), applicable to regulated investment companies, and to distribute income to the extent necessary so that the Funds are not subject to federal income tax. Therefore, no federal income tax provision is required.

Unrealized Appreciation and Depreciation on Investments (Tax Basis) The amount of net unrealized appreciation/depreciation and the cost of investment securities for tax purposes, including short-term securities as of December 31, 2022, were as follows:

	Aggressive	Ultra-Small	Ultra-Small
	Investors 1	Company	Company Market
Gross appreciation (excess of value over tax cost)	\$12,822,905	\$15,643,182	\$42,912,536
Gross depreciation (excess of tax cost over value)	(14,983,377)	(18,420,153)	(61,409,060)
Net unrealized (depreciation)	\$(2,160,472)	\$(2,776,971)	\$(18,496,524)
Cost of investments for income tax purposes	\$142,275,738	\$86,579,682	\$221,165,960

	Small-Cap Value	Managed Volatility
Gross appreciation (excess of value over tax cost)	\$57,068,645	\$7,349,769
Gross depreciation (excess of tax cost over value)	(57,702,930)	(544,734)
Net unrealized appreciation (depreciation)	\$(634,285)	\$6,805,035
Cost of investments for income tax purposes	\$537,735,310	\$20,725,488

The differences between book and tax net unrealized appreciation (depreciation) are primarily due to wash sale and straddle loss deferrals.

Classifications of Distributions Net investment income (loss) and net realized gain (loss) may differ for financial statement and tax purposes. The character of distributions made during the year from net investment income or net realized gains may differ from its ultimate characterization for federal income tax purposes.

The tax character of the distributions paid by the Funds during the last two fiscal years ended June 30, 2022 and June 30, 2021 respectively, are as follows:

	Aggressive	Investors 1	Ultra-Small Company	
	Year Year		Year	Year
	Ended	Ended	Ended	Ended
	June 30, 2022	June 30, 2021	June 30, 2022	June 30, 2021
Distributions paid from:				
Ordinary Income	\$1,913,699	\$1,732,414	\$4,776,033	\$-
Long-Term Capital Gain	14,127,616	_	14,127,123	_
Total	\$16,041,315	\$1,732,414	\$18,903,156	\$-

Components of Accumulated Earnings As of June 30, 2022, the components of accumulated earnings on a tax basis were:

	Aggressive Investors 1	Ultra-Small Company	Ultra-Small Company Market
Accumulated Net Investment Income	\$-	\$-	\$1,949,019
Capital Loss Carryovers	-	-	-
Accumulated Net Realized Gain on Investments	_	12,493,629	1,992,833
Qualified Late Year Deferred Losses*	(2,514,682)	(6,629,149)	-
Other Temporary Differences**	_	-	-
Net Unrealized (Depreciation) Appreciation of Investments	(12,386,107)	362,180	(21,688,386)
Total	\$(14,900,789)	\$6,226,660	\$(17,746,534)

	Small-Cap Value	Managed Volatility
Accumulated Net Investment Income	\$-	\$-
Capital Loss Carryovers	-	-
Accumulated Net Realized Gain on Investments	-	1,361,421
Qualified Late Year Deferred Losses*	(2,280,345)	-
Other Temporary Differences**	-	(12,124)
Net Unrealized (Depreciation) Appreciation of Investments	(18,479,540)	6,260,130
Total	\$(20,759,885)	\$7,609,427

* Includes qualified late-year losses that the Funds have elected to defer to the beginning of their next fiscal year ending June 30, 2023. The Ultra-Small Company Fund has elected to defer qualified short term losses of \$(6,629,149). The Small-Cap Value Fund has elected to defer qualified short term and long term gains (losses) of \$(2,280,345). The Aggressive Investors 1 Fund has elected to defer late-year ordinary, short term and long term capital gains (losses) of \$(2,514,682). The Ultra-Small Company Market and Managed Volatility Funds have no deferred qualified ordinary late-year losses, short term capital losses or long term capital losses.

** Includes other temporary differences of \$(12,124) for deferred straddle losses outstanding.

For the fiscal year June 30, 2022, the Funds recorded the following reclassifications to the accounts listed below:

		Increase (Decrease)
	Aggressive	Ultra-Small	Ultra-Small
	Investors 1	Company	Company Market
Paid-In Capital	\$14,690	\$510,366	\$6,839,365
Distributable Earnings	(14,690)	(510,366)	(6,839,365)

	Increase (E	Increase (Decrease)		
	Small-Cap	Managed		
	Value	Volatility		
Paid-In Capital	\$(8,217,491)	\$(26,780)		
Distributable Earnings	8,217,491	26,780		

The difference between book and tax components of net assets and the resulting reclassifications were primarily a result of the differing book/tax treatment of the deduction of equalization debits for tax purposes, excess distributions, the write-off of unused net operating loss, redesignation of dividends paid, investments in PFICs and the unrealized gains/(losses) from the reorganization of the Small-Cap Growth Fund into the Small-Cap Value Fund.

Accounting for Uncertainty in Income Taxes sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Management has analyzed each Fund's tax positions and has concluded that no provision for income tax is required in the individual Fund's financial statements. The Funds are not aware of any tax position for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. Each Fund's federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

7. Line of Credit

Bridgeway established a line of credit agreement ("Facility") with The Bank of New York Mellon, effective November 5, 2010. The Facility is for temporary or emergency purposes, such as to provide liquidity for shareholder redemptions, and is cancellable by either party. Unless cancelled earlier, the Facility shall be held available until October 6, 2023. Advances under the Facility are limited to \$15,000,000 in total for all Funds, and advances to each Fund shall not exceed certain limits set forth in the credit agreement, including, but not limited to, the maximum amount a Fund is permitted to borrow under the 1940 Act.

The Funds incur a commitment fee of 0.10% per annum on the unused portion of the Facility and interest expense to the extent of amounts borrowed under the Facility. Interest is based on the "Overnight Rate" plus 1.25%. The Overnight Rate means the higher of (a) the Federal Funds rate, (b) the Overnight Eurodollar Rate, or (c) the One-Month Eurodollar Rate. The facility fees are payable quarterly in arrears and are allocated to all participating Funds. Interest expense is charged directly to a Fund based upon actual amounts borrowed by such Fund.

For the period ended December 31, 2022, borrowings by the Funds under this line of credit were as follows:

Bridgeway Fund	Weighted Average Interest Rate	Weighted Average Loan Balance	Number of Days Outstanding	Interest Expense Incurred ¹	Maximum Amount Borrowed During the Period
Aggressive Investors 1	3.82%	\$370,444	18	\$708	\$1,132,000
Ultra-Small Company Market	3.54%	507,259	27	1,346	1,991,000
Small-Cap Value	3.31%	2,759,643	28	7,101	5,823,000

¹Interest expense is included on the Statements of Operations in Miscellaneous expenses.

On December 31, 2022, Ultra-Small Company Market Fund had loans outstanding in the amount of \$1,025,000, exclusive of interest payable on the loans.

8. Redemption Fees

In Ultra-Small Company Market Fund, a 2% redemption fee may be charged on shares held less than six months. The fee is charged for the benefit of the remaining shareholders and will be paid to the Fund to help offset transaction costs. The fee is accounted for as an addition to paid-in capital.

9. Subsequent Events

Management has evaluated the impact of all subsequent events on the Funds and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

OTHER INFORMATION

December 31, 2022 (Unaudited)

1. Proxy Voting

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to the portfolio securities and a summary of proxies voted by the Funds for the period ended December 31, 2022 are available without charge, upon request, by contacting Bridgeway Funds at 800-661-3550 and on the SEC's website at http://www.sec.gov.

2. Fund Holdings

The complete schedules of the Funds' holdings for the second and fourth quarters of each fiscal year are contained in the Funds' Semi-Annual and Annual Shareholder Reports, respectively.

The Bridgeway Funds file complete schedules of the Funds' holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to Form N-PORT within 60 days after the end of the period. Copies of the Funds' Form N-PORT exhibit are available without charge, upon request, by contacting Bridgeway Funds at 800-661-3550 and on the SEC's website at http://www.sec.gov. You may also review and copy the Funds' Form N-PORT exhibit at the SEC's Public Reference Room in Washington, D.C. For more information about the operation of the Public Reference Room, please call 800-SEC-0330.

DISCLOSURE OF FUND EXPENSES

December 31, 2022 (Unaudited)

As a shareholder of a Fund, you will incur no transaction costs from such Fund, including sales charges (loads) on purchases, on reinvested dividends or on other distributions. There are no exchange fees. Shareholders are subject to redemption fees on the Ultra-Small Company Market Fund under certain circumstances. However, as a shareholder of a Fund, you will incur ongoing costs, including management fees and other Fund expenses. The following examples are intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with ongoing costs of investing in other mutual funds. The examples are based on an investment of \$1,000 invested on July 1, 2022 and held until December 31, 2022.

Actual Expenses. The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during the period.

Hypothetical Example for Comparison Purposes. The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Fund and other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

The expenses shown in the table are meant to highlight ongoing Fund costs only. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds, because other funds may also have transaction costs, such as sales charges, redemption fees or exchange fees.

Beginning Account Value at 7/1/22	Ending Account Value at 12/31/22	Expense Ratio	Expenses Paid During Period* 7/1/22 - 12/31/22
